Why is it so hard to meet all lifting for any reason, regardless of whatever does it to stop, why do humans time and time again refuse to learn from history

Mom can we put the guns down and disarm the missiles, when can we start disarming the world? I know that it's a dream but when can we all people realize that for whatever reason taking another human life is not ok

Why are people still voting a person's age into a conversation and people are terrible in proving the karma, annoyance, name it lands on girls also in the head, does that sound like fun to you? 0.0

Why is the chance you take when you go to war, and people are actually justifying this shit 0.0

We revisited May 20 years ago because of potential "weapons of mass destruction" and we ended up in a war in Iraq, I'm not saying I'm not suggest that the citizens believe they were better off before the war, Venezuela was revisited, a new regime was installed and nothing changed

Looking to connect and talk about the dyspraxic experience

amy_lming 12/29/25
My auditory overload that I experienced earlier really effected me in ways I didn't expect,

amy_lming 12/29/25
I also wish dyspraxia got the same attention as autism and ADHD, I'm kinda jealous

amy_lming 12/29/25
I vent on here alot because I don't have anyone to talk to about how I feel or how I'm coping, If I'm being completely honest Im worthless and trash because it feels like alot of the time no one sees it worth while to listen to me, so I'm stuck in this spiral of low self esteem and self worth which I make worse by taking that out on myself, I need to vent my anger somewhere and other people don't deserve it so I become the target of my own insecurities

> Waded slightly into the waters of arguing with transphobes today. They all seem to think every trans woman is a man who put on a dress last week and started 'identifying' as a woman. The idea there are trans women who have lived fully as women for decades just doesn't exist for them.

Why are people so fucking stupid

> Replying to @amy_lming
> Nope. Sex is biological (man, woman, intersex) Gender refers to a person's internal sense of self. AKA how they feel inside their own mind.

Basically I'm sick of the autism discorse on threads now because people who argue it isn't a disability are dumb, while autism, ADHD, bdp, dyslexia are all talked about and seen, dyspraxia isn't and I bet most of you have never even
