

# DiCEORG : SACRIFICE GUIDE

“THEY SAY THE MOST BEAUTIFUL AND DISGUSTING EVENTS ONLY HAPPEN IN THE BRAIN.”

---

## DISCLAIMERS:

▽ I am not a lawyer. Please research your area's laws towards ritual slaughter and pest control beforehand.

▽ Diceorg is not responsible for your actions. We act as a third party that offers info if needed. It is your choice to follow this guide. Do not blame us if any issue arises.

---

## WELCOME TO THIS GUIDE!

We will be teaching you on how to safely and ethically sacrifice animals for DiCEORG. Remember to make copies, keep this in the right groups, and keep this away from moralfags & antis!

## STEP 1: PICKING AN ANIMAL.

- This step is the most complicated as different states and countries have different laws regarding different animals. Please check your area's laws before following this guide.
- Generally speaking however, most small pests or invasive species are safe to choose.
  - Ex: Mice, Rats, Squirrels, Hamsters, certain Birds.
- Rarely do people go after smaller animals when trying to charge someone for animal cruelty. In fact, several of the listed animals would cause more damage if left alive.

- We prefer mammals as sacrifices since they are more likely to bleed and are easier to dispatch.

## STEP 2: OBTAIN THE ANIMAL.

- You can obtain animals 2 ways: BUYING or TRAPPING OUTSIDE. Each option has specific pros and cons, which will be listed below.

### METHOD: BUYING AN ANIMAL.

PROS: Guaranteed an animal, animal will be cleaner, can have a better selection of the animal

CONS: Often requires an ID, will have to hide animal, purchase may be used to track location, will need money

### METHOD: TRAPPING AN ANIMAL.

PROS: Free if done right, could trap an invasive species, don't need to tell others

CONS: May not catch anything, could trap an endangered animal, people may interfere by setting animals free

## STEP 3: DISPATCH THE ANIMAL.

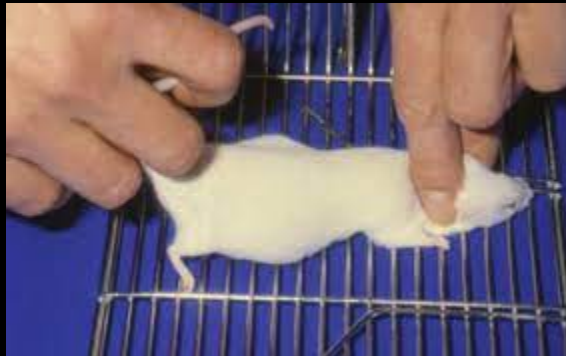

- The hardest part, but it must be done. You can't sacrifice something without losing something in the process. It should be done as quickly and painlessly as possible.
- The most humane dispatching methods are as follows:
  - CO2 Chambers
    - A small chamber that will suffocate the animal without it knowing. The animal will be unconscious by the time it dies.
    - There are several guides on building one online. It takes 15-45 minutes and you do not need to watch the mouse die.

<< A CO2 CHAMBER.

## - Cervical Dislocation

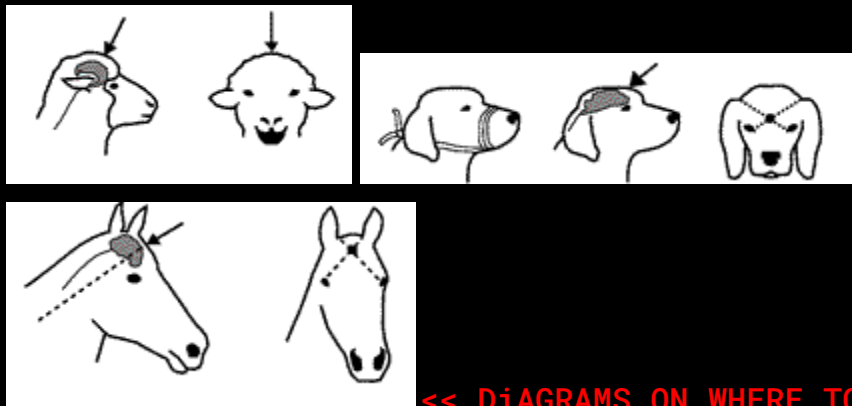

- Fastest method of dispatch, but can only be done to small animals and you must be quick with it.
- Causes instant death after you dislocate the neck.
- You hold the animal by the tail, and make sure it can grip a surface or "stretch" itself out. Use a pencil or any similar tool to hold the neck down and pull sharply on the tail.

<< THE MOUSE SHOULD BE LIKE THIS.

## - Fatal shot to the head

- Disturbing aesthetically, and a bit too cruel for smaller animals, but still possible.
- Aim 1-2 inches from the head, ensure the bullet is between the eyes and will hit the brain, then pull.
- Do not be worried if the animal seems to convulse. This method will have any animal move violently, it is not a sign they feel pain.

<< DIAGRAMS ON WHERE TO SHOOT.

ENSURE THE ANIMAL IS DEAD AFTERWARDS. SIGNS OF DEATH INCLUDE:

- Animal is no longer breathing. Observe the animal for at least 3 minutes and ensure that there are no chest movements.
- Animal no longer has corneal reflexes. The animal should no longer blink (even if you touch it), the eyes should be fixed and "glazed", with dilated pupils

- No muscle tone. The animal must be limp and should not be able to stand up or tense up.
- Heart has stopped beating. You need training to test this but if there's no heartbeat, it is a sure sign of death.

**Note:** It would be appreciated if you recorded yourself performing this. You may cover your face, not speak, and wear gloves if you're concerned about privacy. Send the recording to us after!

## **STEP 4: OFFER THE ANIMAL.**

- Get a knife or any sharp object that can cut. Box cutters work.
- Carve or draw blood from the corpse. Be precise and careful, do this right after death to prevent any issues.
- Make designs and go wild! Some examples of what you could add make
  - The DiCE logo (upside down triangle on the first page)
  - The following phrases / words
    - @Diceorg
    - JOiN DiCE
    - 2051
    - WE WILL BE EVERYWHERE
- Once you are satisfied with your work, take a photo! If you would like to state it was you specifically, add a piece of paper with your instagram handle / discord tag next to it. Otherwise we will handle it anonymously to the public.

## **STEP 5: SHOW US.**

You may contact us the instagram handle @diceorg , or the discord tag DICEORG#2051.

**GOOD LUCK.**

*"WE ARE GOOD WHEN WE ARE HAPPY, WE ARE NOT ALWAYS HAPPY WHEN WE ARE GOOD."*
