

First Cryptoland AMA – 25.11.2021, 1PM GMT +1 (Lena, Max, Cryptopher)

- When does the building start:
Softcap of 30 King Cryptolander ~60 Million, to start the Project “physically”.
Most current interested people are waiting for takeoff before they commit.
- What is approval in principle?
Fiji government approved the building plans and architectural ideas. Masterplan is approved now by officials (25.11.2021).
- When emojis for Discord:
Discord will evolve with the time.
- How to get more Parcel owners?
Contacting big companies and VCs to offer them a place on the island (not a parcel). This will bring traction. Most people are stunned by the big efforts that are needed to make Cryptoland real. Atm all social media channels are growing and many talks are going on.
- Lend/rent out Cryptolander or even King Cryptolander NFTs?
It’s an exclusive community and we have to see how it stays exclusive. The idea of renting out is nice, but there is no certain plan at the moment.
Biggest problems are the laws and regulation. Moving digital to physical is really complicated. Sometimes nice ideas would be illegal, so we have to find other ways. The Island will be owned (and managed) by the community, by the NFT holders.
If renting and lending brings value and to grow the power of the NFTs, we will consider it.
- When do you expect Cryptoland being open for business? What about the graphics?
Open for business: Construction starts around 2- 2.5 years. People can be there than already.
Graphics: For the movie we needed a design, architectural designs etc., and this will be the style of the Cryptoland. Even better 😊
- The Giveaway is over?
Yes, The announcement will come till the end of the day (25.11.)
- Insights of the team, size, who is needed:
Max + Lena = Founders (watch the video on discord for more information). Family background involved in Real Estate and Architecture. Strong Crypto believers since 2016.
1 layer: 5 top-people in the team, 2 layer: are architects, lawyers, accountants, etc.
In total around 50 people involved. Everyday is 5 people, start up setup: Out sourcing, being quick, efficient.
Needed: Graphic designers, animators, creative minds, artist, help with the website (web-developer and designer).
- Next whitelist opportunity?
Infos will come in the discord.
- Other marketing for more exposure?
Exclusive focus on top crypto projects to get traction.

- Bigger Question Block:
 Live updates from progress on the Island? Yes, by media channels etc. Maybe in a couple of months.
 Track for development? Yes, in the Why-Paper. All times are there.
 Updates from day 1, will someone be there? Yes, Max & Lena will be there from day 1.
 Biggest challenges in front of you? Fundraising is actual the biggest; getting Cryptoland on the spotlight is the most important.
 Cryptoland is like an umbrella for the whole Cryptoworld, it's not only a Metaverse project.
 Will be there a "Metaverse" of Cryptoland? Working on the digital version starts after the funds to start building the real Island.
 How many King Cryptolander NFTs a minted? So far only Kyles King Croptolander is minted.
 We need to go into the spotlight to get more!
 Will there be a token sale? It's not fully planned yet, might come. But a token will come
 What marketing are you doing atm? We are pre-marketing, we focus on the spotlight and direct contracts.
 Other King Cryptolanders already? We can't spoil the names atm, but some of Kyles friends are interested 😊
- Security (Criminals, pirates, terrorists, guns etc.)?
 The Island access will be controlled. Maybe a control tower with radar, maybe some drones to observe and track individuals which were not welcome. In Fiji there are no pirates atm, guns are not allowed, it's save in general. 24h security will be there, but not a police state.
- When will there be a new website?
 We don't know yet exactly, if you are a web developer, reach out to us.
- Who will exploit the resort?
 Hills by King Cryptolanders, Vladimir Club by Cryptolanders, Resort and HOD will drive income to the island.
- Selling parts of the project?
 No, it's our live-vision and heart-project. We will not sell, maybe cooperate with "some level passionate" people.
- Investment numbers?
 100-150 million in total ish, at least 50 million to start. We don't want to go for the risk. This is a long term project!
- Since when in crypto?
 Founders get in Crypto 2016. From a personal family situation they realized how the world is, and what options are there: Eyes opened.
- Collaborations with other big crypto companies?
 Yes, maybe more info in the week from 29.11.21 onwards.
- BTC or ETH?
 We love both.

- Do you own the island?
No, we wait for 30 people to buy parcels first. We have the Island reserved and no one else can buy it at the moment.
- What happens if 30 CK don't come together. Plan B?
Plan B is changing the marketing strategy till we got our 30 CKs.
Or maybe make a token sale.
- Why is minting free?
We like the chance for everybody to drive this project. Inspiration from the Crypto Punks.
There is no downside for owning a free NFT from now on.
- Everything seems to be for physical presence. What comes for people who are not on the island?
Here the metaverse hits, the virtual experience will give the feeling of the island. Even from far away and in 3D in certain areas. Of course this needs time.
- Landshare concepts?
At the moment we move quick, and this takes a long time, so the focus lays somewhere else for now.
- Monetization and sustainability of the Island?
The resort (renting for events, etc.).
- Did you think about staff and organization for them?
Yes, we have a dedicated area just for the staff (around 300 full time people). There will be houses etc.
The island is close to the mainland, so it's easy to go (2 minutes with boat ish). But we also want crypto people to work there, like chefs etc.
- Token?
There might come a own token for the metaverse, which will also work on the physical island. More details will come one day.
- Idea about timeframe for ROI?
We don't know the exact numbers, since best and worst case are far away from each other.
We hope for 2-3 years from now, it will also help to keep the growth going on.
- Fiji Government thoughts about an Island full of Crypto people?
They know what we are doing. They are open for what is coming, because they desperate need tourism. Fiji doesn't fear the crypto world, they understand the wealthy crypto community. So it's their shot to turn their country into the future.
