„Propaganda works best when those who are being manipulated are confident they are acting on their own free will”

-Joseph Goebbels

INTRODUCING

I'm Commander Butcher, long-time National-Socialist and propagandist of underground organizations. In this book will be shown my views on the perfectness of combined ideology, a guide to victory and as well work of propaganda and manipulation of sheep's as they should be called. Also warning for Christian readers who put religion over ideology, that's the reason why we lose wars for decades, because your enemy simply manipulates you by telling you that you're a sinner and you shouldn't kill. That's the biggest problem today if you think like that and don't accept violence don't even call yourself NS, not anymore. True NS warrior is cruel and no one can stop hatred.

COMBINING TWO DARK FORCES

Today National-Socialism is known as the most hateful ideology and as well most hateful religion is Satanism. By combining these two there will be few categories: One who will find the true path of darkness, Secrets of leadership, and manipulation. The Second one will be those who need someone's guidance to strength and will give it to him. A Third one will be the poser, the one who will betray you first and then be shot by his people. NS and Satanism will balance you up and will turn your madness into unlimited power and give you ambition of leadership. Almost every single person stays the same and doesn't want to change, because is afraid of the opinion of others and starts believing in his own life. A Smart man will overthink twice and based on his personal view he will decide what is right and what is stronger even if the whole world turns against him. 90% of readers only just read once and even don't acknowledge what they have read. No one can

force you to do it unless you want it. Satan will bring you power that you just can't explain that simply in a book, you must feel by yourself. To reveal true dark force you mustn't chase one ideology, but you must always be 10 steps more forward than your enemy. To start Anarchy, Race War and Chaos first of all you must see which movements are most easily manipulative and which of them will bring you success. This is called Masking Inside Their Ranks. You can start with white terror, but if there were not enough people maybe you should better accelerate it into other movements and use your enemy against the capitalist government (Fighting Same Enemy).

It could be Red Terror or Islamic Jihad deepening where are more easily manipulative sheep who will rush their lives by exploding themselves into parliament for example. Use lie as the biggest weapon and while you will be wearing a mask of Allah, Great Shaytan

will be standing behind it. Remember that if you have a chance to control reds or blacks do it because it's better than killing our own people and letting them do it. It's even better if we will leave that option last. Each side will start killing it's own and as both will become weak it will be easier to defeat all sides because we have many enemies, the whole world is against us and our amount is smaller. Blood must spill everywhere to start a new world and a new white race. David Myatt was one of the first man thinking of using his enemy for his own goal after the great Führer himself. After successfully using enemy media will start showing off how bad they are if they go against the government and people will wake up because usually, sheep believe in Media, but this time for our own good. Of course, the instinct of self defense will wake up inside them and by wanting to defend their land they will start killing our enemies. We can bring up the live example of the BLM

Riots of 2019-2020 and crime rates haven't still dropped yet. After that many have been radicalized by NS ideology and hate started growing inside every white victim of the BLM movement of course if they aren't retarded. Every time propagandist words get proven over and over again that propaganda really works. Before making propaganda to make it successful you should spread it over most used platforms where any holder of any ideas will see it. We have another great example of the 15 March 2019 Mosque Attack. Sir Brenton Harrison Tarrant was a great inspiration for future shooters. Some of them weren't successful like Christchurch but hate spread all across the world. I believe we could have even more attackers if Anders Behring Breivik did the same and recorded the whole attack. It's a sure thing that he became more popular after Christchurch because more kids turned into radicals and if they were

shitposting on 8Chan, who knows they might be already preparing new attacks.

NO ROOM

No one loves or respects us today so there is no going back, our attacks won't change others' opinions it's good or bad. Some poser NS says that our Terrorists give us a bad reputation. Never believe their lies it doesn't change anything to us they hated us and they will hate and we won't force anyone to join our ranks there is just no room for them. There has also been a great group created in Ukraine M.M.C (Maniac Murders Cult) also known as M.K.Y (Маньяки Культ Убийств). The Creator of the group is Egor Krasnov AKA Egor Maniac. Many right-wing groups hate them too just because they think it will create a worse opinion on NS people by surrounding society. Egor is a very smart leader who dragged many kids who were not even NS at the begging and killed himself 20 trash subhumans. Here is the clear psychological image of the leader here are 3 important things: Good Propagandist, Manipulator, and Warrior himself. You just can't become a

leader if you don't have those skills. At this moment M.M.C is located in over 6 countries and killings continue from 2017. As he dragged few kids to this thing of course later they decided to betray the cult because it was just temporary hatred in their bodies and they are weak and passive. Sooner or later after the leader declares a traitor he/she gets killed. Such traitors are only harming themselves, it's even hard to call them that because they never were NS or something compared for that. The whole point of this chapter is that those who are thinking that political solutions will work without violence are dense people. There never has been such option as peaceful solution. You can start killing people now.

MANIACS
MURDER
CULT

MAN AGAINST TIME

The 21st century is the hardest time to act, but it will be harder if we won't start doing something right now. Don't think someone will do this instead of you and everything will be served as you want. Anti-Tech revolution is most one of the most important things, humanity is falling to degeneracy. If not niggers, then tech will replace you and it will happen maybe in 20 years. You might think this is bullshit and it's not possible that soon, but depending on experiences that gonna happen if you won't try to take over the government. Always remember there's not only one thinking like you, Usually, people are afraid to reveal their thoughts because society will turn against them, but if not this how are you gonna live the perfect world you want? Ted Kaczynski tried taking adventure himself in 1969 returning to the primitive lifestyle of human beings and after 50 years his ideas are proven and proven again as right. Warfare is going to be harder because of too

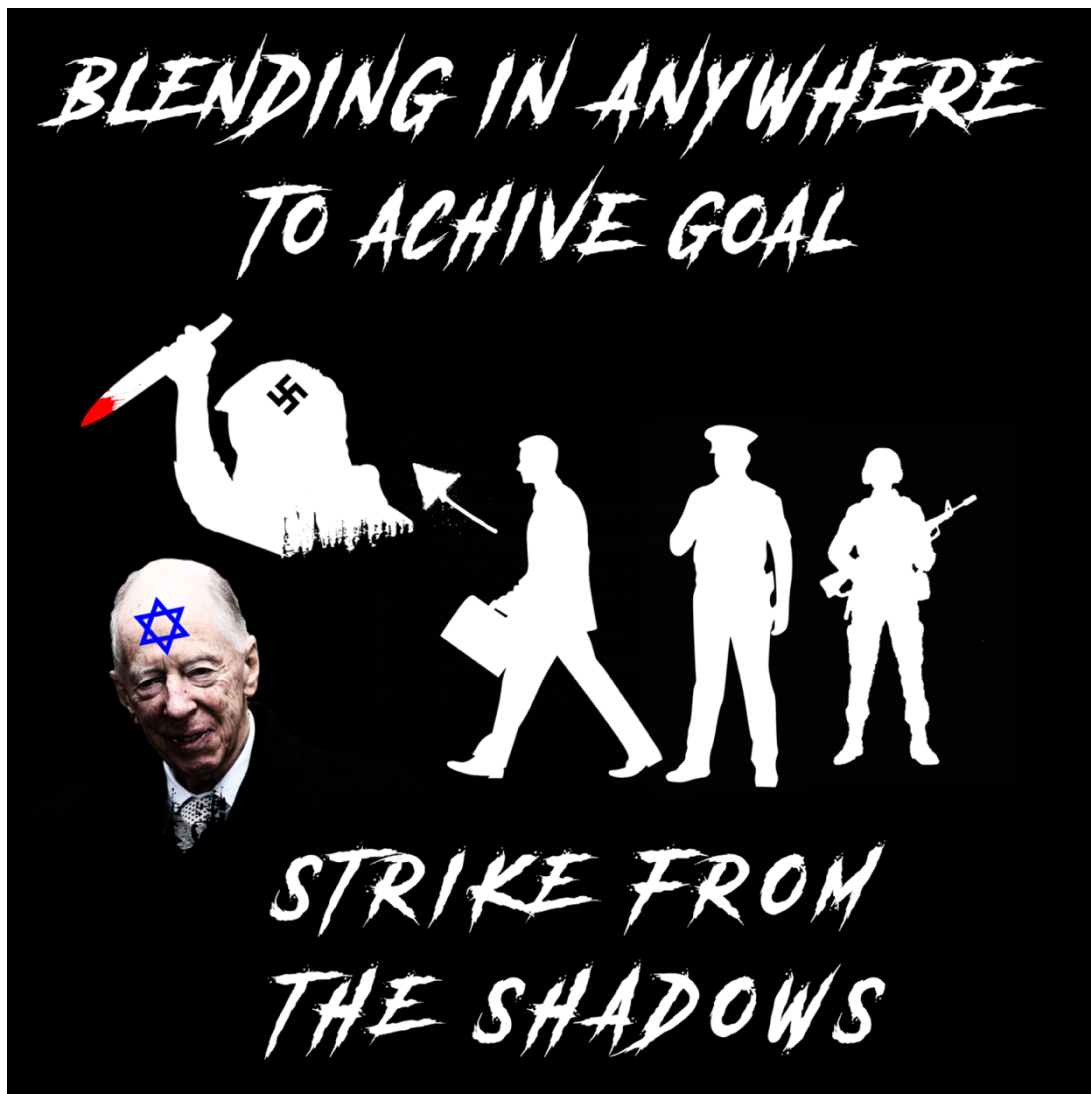

much technology, there are already enough devices that can rip you off in seconds but haven't reached it final phase. Before it's too late thirsty wolves or organized people must start with terror attacks. If you have the option of going into politics don't be shy to do it, find the most voted political party with higher chances of a win and maybe that will be an only political solution that will work which will prevail later as deadly terror. Technology will bring humans on their knees if we lose this war. Losing war means starting new life and new race.

BLOODTHIRSTY WOLVES

There are always one's hiding dark underground preparing mentally and physically. Groups like that should regain their trust in each other and start learning the weaknesses of enemies before the attack. For example, they even can start attacks without getting caught. You can simply attach a detonator to an RC car and just drive it through a rally or fly a drone and explode it near politicians head it's up to you. Before all gadgets are 100% controllable you can use tech for your good to destroy it and weaken the enemy. Be ready that sooner or later your doors will be taken down, you must always have few options to escape. Before doing something plan everything 10 steps further and then ask yourself again if it's worth it, be ready to practice in the woods by hunting and setting off traps. Attacking and keeping anonymity is you're best option and it's better

to attack a few times and get the bigger score, then strike once and get killed. Starting a war is important because we can't sit down anymore with our mouths shut. Show no fear as a true wolf should. Everything happening today is not by accident and history has warned us already about that. Dirty politicians want us gone, but empires always destroy and we've been preparing for this because we won't be weak, not anymore and no one will crash us. Become a living god by spreading fear, plunder, and hate. Disguising is the best weapon any assassin should use and we are no exceptions. Don't tell your plans to anyone, posing will only bring you to failure and disrespect of your ideological brothers. Future guerrilla warriors must blend in society and out of a job no one is National Socialist. Masking will gain your trust outside if you have a connection. You could be a Politician, BLM/Antifa leader, Jihadist, Pig, or just a normal civilian who obeys the law. Using

such tactics will make the enemy blind and it will be easier to strike from shadows because no one would think that was you. If acts should strike against humanity let it begin then. Escaping problems was never a solution and especially for NS warriors.

**NO MORE
RESOURCES**

There are too many people on this earth and there is nothing left for us. People like us who want to live should start exterminating other human beings. There are no resources and we should start massively executing Asian people for our good. If they will continue to reproduce they will replace us. Their food and air should be poisoned and their cities should burn with children. For those who want their children to live is only one thing left, the white race should start to reproduce as fast as possible and each family of our race should have at least 3-5 children to overtake control. Marching on the streets or seeing no hope is not a solution.

**TURNING
MOVEMENTS INTO
FOURTH REICH**

Today there are tons of useless movements who march, fly over their flags, and fight with bare hands. In the end, the movement ends up because their leader gets killed or jailed, members are not ideological anymore and also there are rats. To keep movement every leader of different types of movement should reunite together and discuss all together. After that when there will be everyone across the country it will move to the next phase. Ambitions will overtake members of the group and they will want to ignite a war and overthrow the government. In such massive numbers chances of creating The 4th Reich will jump up momentarily. In order of success every member should arm himself to teeth to make government feel fear. After everything is done our people start robbing down stores, burning banks and blowing up political party offices. Overtaking government will make it enter next phase. Anarchy, chaos and fear will make other people kneel. Journalists, Jews,

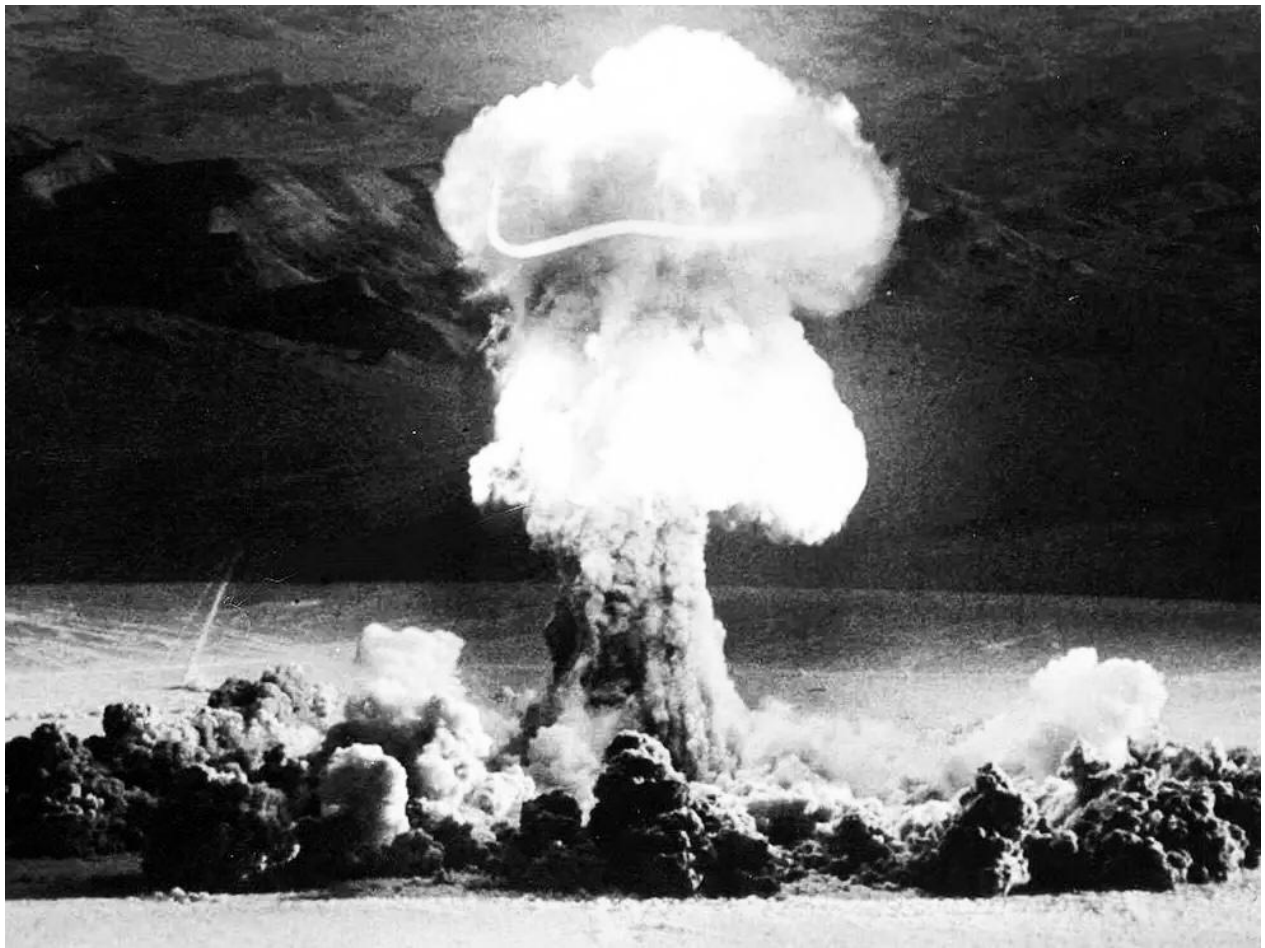

Niggers and other trash should be executed without showing mercy. Traitors will regret everything and principles of Zero Tolerance will spill their blood. And what we should do next? What will be next move? Unity is best option today for us now for biggest success chances. One attack won't change anything, there must be few of them planned in row.

STARTING UP COLLAPSE

To start a collapse in our enemy's lair,
soldiers of future reich gonna start blowing up
nuclear stations and power plants on nonwhite
lands. By wiping out half of population new
earth should prevail as dark light strikes on it.
Nuclear war is what exactly this Earth needs,
to be cleaned. Even if attacks won't be
successful, Mother Nature is Fascist and will
rip off this dirty place sooner or later. This
will be start of new life and hope for a better
place. Humans will evolve into other sorts of
humans, there gonna be new types of animals
which we don't know for this moment. What
should we expect from future? New future
race will learn that many disasters came from
modern technology which turned their
ancestors retarded. New earth means new
adventures, new geographical landscapes, new
evolved food and many other stuff. Humans
will become strong again to stand together and
fight next invaders as war is always endless.
Prevailing new life is new phase and next one

of most important move. When nothing from modern world will be left, our future generation will go outside and see light. Step to a new life will start new history.

ART OF DEATH

Killing someone is one of best feeling you could ever experience in the world. It will turn into great orgasm and you'll feel power of making others live in fear. Death is another entrance of life. Hate is greatest weapon you can use as revenge by defending yourself, your family, your race. Sociopaths, Murders and school shooters must be warned that they can feel much better in our ranks by killing low level class people and cleaning that bio trash. For those who just can't afford or get license because age, they must start training now by going to gun ranges, gym and becoming mentally stable. Cleaning earth will be one of the most satisfying thing ever done. Every nigger baby must be hung on street lamps, to make hate bigger. Hate is unstoppable weapon. Leader must have all functions of the great dark triad.

THE DARK TRIAD

SADISM

ATTACKING AT RIGHT
TIME AT RIGHT
PLACE

Back to game again and when everyone will be united and each NS will hold their back after all movement come together, what will be best option for success? What should be done to make race war chances bigger?

Attacking Muslims, Gays and other trash will only put you in attention of feds and they will take away your guns. Best thing NS activist soldier can do is to start attacking politicians. It will be better than shooting up some mosque or gay parade for sure, because after getting to power, sword will be drawn anyways. Blowing up banks and place where they print money will help making currency falling down. While this happens every business man fall in panic. If one of the members get caught by police for killing high primary targets, he should give them offer. If they refuse it actions will continue. This must be well prepared to succeed else it's only waste of time. Still killing high primary targets is best thing you can do. When you do

it your actions won't be forgotten and will help raise chances to get NS people into politics again.

PSYCHOLOGICAL WARFARE

„For an event that was wholly created in the poisonous psychological warfare kitchens of the Second World War, run by the ministries of propaganda in many countries, not just by the British or the Americans, but also the Russians and undoubtedly the world Jewish organizations.’’

-Ernst Zundel

A leader should know a way to spread propaganda. It's one of the most important things that will ever work. In National-Socialism propaganda doesn't even require lie, we don't need it because our idea is like brotherhood which stands always together. Emotionally weak or those who want their name in history will make great effort for action. Inaction is the worst thing that movements do today or usually movements act but get jailed for nothing. If all movements will succeed in uniting new great Führer will win the next upcoming war. Humans are so easily controllable. Angry people become uncontrollable and every time you start to glorify them and tell them how good they are, they start to see their selves as gods. The next move is to put your ideas in their head by telling them, they will become heroes. After successfully converting them another goal is reach, media and government start to panic

after they see that's there are no small movements anymore and everyone is ready to die together for their ideas. Skilled manipulators and leaders know that people under bad emotional conditions are the most vulnerable for ideological conversion. Whites who kneel for the BLM movement are even more easily controllable, people like them are sheep who think black will save them. Don't try to convert traitors like that, they are lost forever and they'll betray you sooner or later. Dealing with traitors can be done only by a bullet.

WHAT TO EXPECT IF
NOTHING CHANGES
SOON

2019 has been a hard year for whites and one came up globally and another only in the USA. BLM started a new type of revolution, but this was a good effort for us. After 2019-2020 there were produced more NS which is better for us and a great chance to start a race war. The second problem was COVID-19. At peak of 2021, they start us to force vaccines. The government never cared about our people and why have they started to worry now? Woke people usually say it is a genocide weapon to exterminate the population. I've been thinking and maybe there is another function of the vaccine because everything is possible. My theory is that vaccines will make people dumber so humans will never break out of their chains and will serve those Jewish rats behind all these projects. It's a pretty simple theory because usually, only old people die from the virus and others stay alive. The only healthy young generation will survive, but they are easily manipulative and

before it's too late we must put our ideas in their heads. Whoever made this virus is retarded pussy who can't start a war with a gun. If creator of the virus is white that's the biggest traitor in the entire history, but I am sure it's Jew because they want to replace whites with niggers and gooks. Solving this global problem as I said before should start right now by striking fear, violence, and terror in the enemy's heart. If they will vaccine required don't be afraid to stand up and organize attacks, it's best thing you can do with your life. By attacking you will save future generations of the white race. And what will happen if things start to change? I think world war 3 and as always whole world will be against us. National-Socialists are everywhere around the world and it will be hard to predict which country will start it off. But when it will move globally it won't be just war between different countries, but each country will have in civil war under name of

race war. It will be greatest mass extermination of high level targets, religious worshippers and other enemies of ideology. Planning should take its own time and while every politician world widely will be executed new government will be on its way.

WHITE RACE ONE
RACE

It's 21st century and there are bigger problems to come. In period of World War 2 there was meaning like pure master race. Today it's impossible and whites should start mixing with each other because other races want us destroyed. Racial purity was never possible, but at least everyone should stay white. In mixing white people will create new future race that will be better thinking and smarter. People usually just sit down and hope that something will start to change to good, but within inactivity everything is going worse and worse. Inaction is worst thing ever. It doesn't matters religious are you or not, even in religion inactivity is biggest sin and it's better to be evil than good. After soldiers of devil will wipe out world with Satans hellfire. Every white will start destroying buildings, factories, cars and everything that represents modern world today. When we will succeed there will be entry in new life. Each will start to live life like it was early in past. With such

a lifestyle hunter's instincts will automatically wake up inside warriors. Everyone will find resources and man should do everything to save his family. White internationalism is best thing to offer now, think about it.

WHITE INTERNATIONALISM

STAY REALISTIC

IN THE END

Congratulations you've just come to the end of the book. If you haven't learnt something from here, that means you are perfect and ready to act. Everything is up to you each choice you make will make clear what is right and wrong. Political or Non Political both of them should lead to terror to succeed. Peace won't solve problems and we don't need it either right? Try learning dark psychology and observe yourself spiritually. Everything in this book is easily compressed and written as small as possible so everyone will learn something from it.
