

NinKaz

This document shows everything that NinKaz (a popular creator who has a level in a gauntlet and a lot of other popular levels) has done that is questionable/pedophilic.

NOTE: we are not homophobic and did not hack his account because he made a gay level, we hacked him because he had a shit password lmao

Evidence 1: messages

After getting into NinKaz's GD account i looked through it just to see what was on the account and saw that NinKaz sent gd messages containing links to cub porn to Ceruffify, who happened to also be exposed for being a pedophile. 😞😞

It also appears that he was good friends with Ceruffify and they could have possibly known about what they were doing, but there's no way to confirm if that's true or not

Also no matter how long ago this was sent it does NOT mean it was ok to send, even if its 5yrs

Evidence 2: twitter following

Ninkaz's twitter (<https://x.com/ninstarkaz>) is following weird ass nsfw accounts, mostly splatoon nsfw accounts for whatever reason

Some of the accounts that you can see he follows have suggestive drawings of what appears to be kids/loli

Screenshots of accounts below

(some of these can have translation errors since they're translated from japanese to english)

Theres more weird shit that accounts he follows have posted but im not gonna add all of it, you can view what else they follow at their following page <https://x.com/ninstarkaz/following>

Evidence 3: FlurryBun alias

If you go to NinKazs github (<https://github.com/flurrybun>), its not actually named ninkaz and instead named flurrybun, searching up “flurrybun” will show up with a bunch of fetish furry art 🤔

Just a bunny who is into "bigger" things! :3

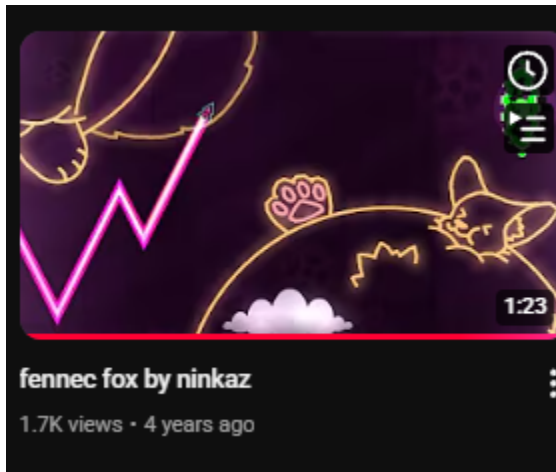

A screenshot of a GitHub profile page for the user "flurrybun". The profile picture is a circular illustration of a white bunny with pink flowers on its head. The page shows navigation tabs for Overview, Repositories (14), Projects, and Packages. Under the "Pinned" section, two repositories are listed: "ninkaz-editor-utils" (Public) and "colorful-icons" (Public). Below this is a "287 contributions in the last year" section with a calendar grid showing activity from November to May. The text "okay so like..i've been thinking—and no, that isn't your cue for a mean joke about me being dumb, got it??" is visible in the bio area. A "Follow" button is also present.

On the "flurrybun" alias ninkaz would upload fetish porn such as inflation, piss, and art including his oc and pokemon mew. im not gonna show any of the art but you can view it in the link below (dont look at it if youre gonna get grossed out by it!!)

<https://furarchiver.net/Artist/Gallery?artist=flurrybun>

Also, this page was last updated in 2023 meaning that hes been making this shit until only like 2 years ago

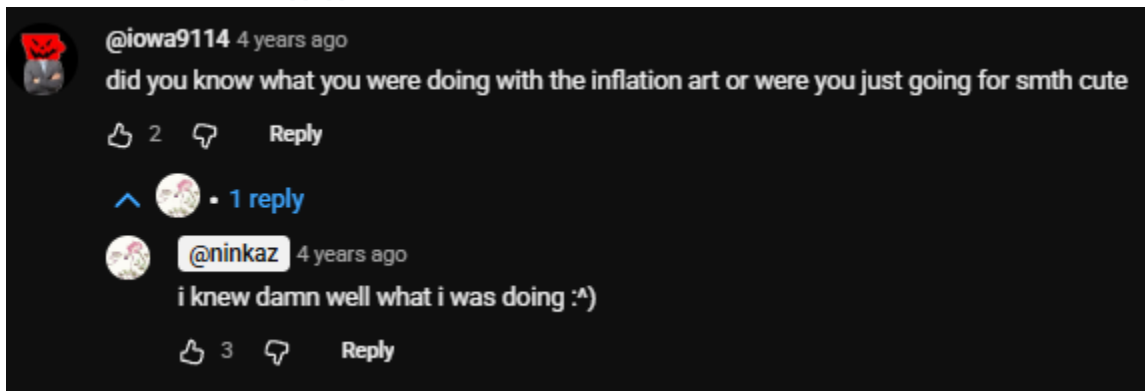

This may not seem like its too big of a deal at first other than that theyre just fucking weird until you realize they have a rated level named “fennec fox” which contains inflation art in one of the parts as shown in the thumbnail below

https://www.youtube.com/watch?v=BH44o_2fC4g

This means that fennec fox is more than likely a fetish level and it got fucking rated 😞
Uploading fetish levels to a kids game is a pretty weird thing to do imo and i think any normal person would agree with me

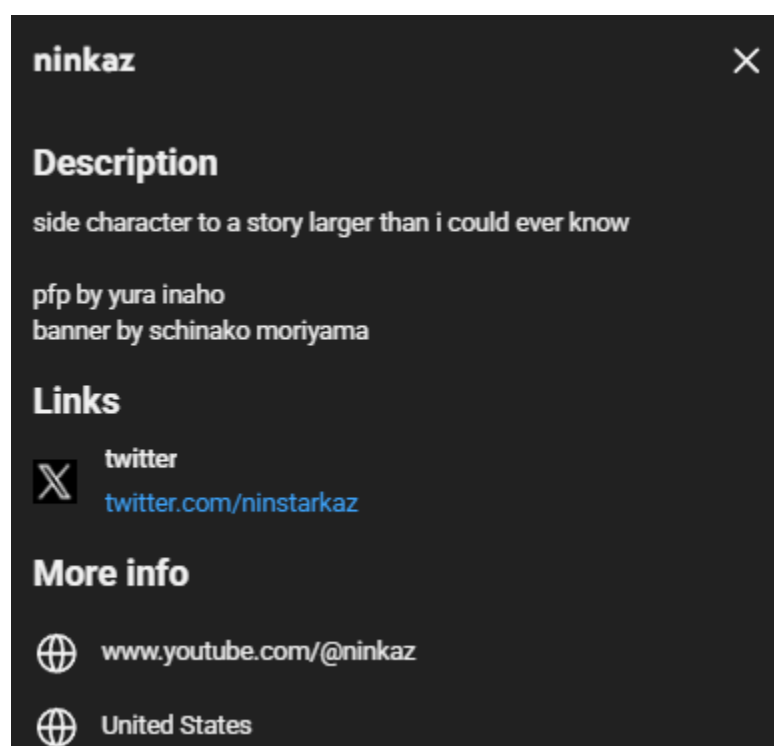

He also literally admitted this is a fetish level under the comments of his youtube video he made showcasing the level 😞😞

NOTE:

To all the super smart reddit users saying “oh lolicon isnt illegal and it doesnt make them a pedo” it is in fact illegal where ninkaz lives and is a child sex crime

Strict federal and state laws protect children from **sexual abuse, child pornography, child molestation**, and other **sex crimes**. Our laws severely punish individuals for a variety of sex crimes involving children. However, many people are unaware that watching cartoons could get them into trouble legally. Watching animated depictions of children engaged in sexually explicit conduct or sexual activity could result in a **child pornography charge**.

This is all the current evidence on ninkaz
More might be added soon
