SRS in USA

[Wiki Index](#)

I don't know if this society actually does anything or is still active. I never hear anything about them.

- <http://www.gendersurgeons.org/> - American Society of Gender Surgeons - *"The American Society of Gender Surgeons was established in August of 2016 by thought leaders in gender surgery across multiple surgical subspecialties. The society was established to stimulate and encourage study and research in the field of gender surgery, to provide a forum for the presentation of the latest techniques, research, and relevant clinical information, and to serve as a unifying authority on all areas of the field."*

- <https://www.urogyncentersf.com/>
- <https://www.youtube.com/channel/UCAth3RFXgVvtNzjziaNEkWw>
- <https://www.mozaicare.net/gender-nonconforming> - *"Gender Nonconforming Surgery. We understand that some patients will not be looking specifically for transfeminine or transmasculine surgeries. For these patients, we offer individualized surgical options. Examples include penile preservation vaginoplasty and vaginal preservation phalloplasty. Please contact our office for a consultation for more information."*
- <https://www.mozaicare.net/peritoneal-pull-through-vaginoplast> - *"Penile Preservation Surgical Options"*

<https://www.mtfsurgery.net/surgeons/dr-heidi-wittenberg.htm> - *Dr. Wittenberg offers Gender Reassignment Surgery with a number of possible variations. For example, a traditional Penile Inversion Vaginoplasty includes bilateral Orchiectomy, Penectomy with preservation of glans and shaft skin, and penile inversion often with a secondary scrotal graft. For non-binary individuals, Dr. Wittenberg can perform nullification with stand-alone Orchiectomy and/or Penectomy. Dr. Wittenberg can also preserve the penis, if desired, and perform Orchiectomy and Vaginoplasty using scrotal and groin or abdominal skin.*

In his 2016 paper [Men's health and transgender surgery: a urologist's perspective](#) a significant part seems to be about *Managing patient expectations*, and in particular genital dimensions (managing expectations is generally a euphemism for preparing for disappointment) - *"For transgender women without a history of circumcision, the gold standard technique is penile skin inversion (where the shaft skin itself is inverted and passed, with the shaft base intact, into the neo-vaginal space). This alone generally yields sufficient skin for satisfactory neovaginal depth (minimum 4 inches)."*

Documentary

- Trans (2012) - <https://www.imdb.com/title/tt2351417/> "TRANS is an extraordinary documentary feature about men and women, and all the variations in between. It is about the Transgender Community, perhaps the most misunderstood and mistreated minority in America and around the world. **Inspired by the incredible story of Dr. Christine McGinn** and her work as a transgender surgeon, TRANS provides an up-close and very personal vision into the lives, loves, and challenges of a remarkable cast of characters of all ages and from all walks of life. Stories of confusion and courage, excitement and emotion that have never been told, until now. To anyone who has ever looked in a mirror and wondered, 'who they really are?' TRANS ask another question, 'are you brave enough to find out?'"

Kiera Kristine DeSantis died in 2019 as a result of complications of surgery with Sherman Leis

- [A Butterfly for Her Mads \(Parent\)](#), her post a month earlier [The Inevitability of Transition](#) - "Because of the assault by the current U.S. administration on health care in general and trans-affirming health care specifically, Kiera felt she had a short timeline for what seemed a once in a lifetime opportunity for gender-affirming surgeries. She scheduled three surgeries in two days with Dr Sherman Leis in Philadelphia, knowing that it would put her at risk of infection or other complications." and "Unfortunately, complications had removed all hope of recovery for Kiera by March 31, 2019, the Transgender Day of Visibility."

Nashville Scene

- [A Look at Transgender Health Care in Nashville](#) in November 2019 - *"Be that as it may, transgender Nashvillians will be seeing a lot more of Vanderbilt's Clinic for Transgender Health in the years to come. With **new hire Dr. Julian Winocour's first Vanderbilt vaginoplasty scheduled this month**, Vanderbilt's full-time LGBTQ Health program manager Del Ray Zimmerman has racked up a few successes: He's helped overhaul Vanderbilt's burdensome phone and technology system to cut down on flagrant misgenderings from nonplussed receptionists, and in December, Zimmerman will meet with outside consultants about ramping up the transgender clinic's services. ... Once Dr. Winocour and Dr. [Salam A.] Kassis have surgeries under their belts, I will have a better understanding of what I can tell patients."*

Texas Medical Board

- [Order Granting Termination](#) in 2011
 - [2005 Press Releases](#) - RAPHAEL, PETER, M.D., PLANO, TX., Lic. #G8361 On June 8, 2005, the Board ordered that Dr. Raphael's Texas medical license be immediately suspended. The action was based on Dr. Raphael's failure to comply with all of the terms and conditions of an Order Dr. Raphael entered into with the Board on December 12, 2003. Subsequently, and also on June 8, the District Court of the 353rd Judicial District in Travis County, Texas, entered an Order denying Dr. Raphael's application for a temporary restraining order against the enforcement of the Board's Order.
 - [2003 Press Releases](#) - RAPHAEL, PETER, M.D., PLANO, TX, Lic. #G8361 On 12-12-03 the Board and Dr. Raphael entered into an Agreed Order that included a 45-day suspension, public reprimand, and probation for 10 years. The action was based on a determination of substandard care that resulted in the death of a patient receiving multiple plastic surgery procedures. The findings of substandard care included issues with anesthesiology, inadequate staffing, length of surgery and the high volume of liposuction performed in an unaccredited outpatient surgical center.
