About This Report

This report documents a thorough analysis of the Internet domain name "**StudMall.com**". It draws on the extensive DomainTools dataset and aims to deliver a comprehensive view of the domain's ownership profile, key historical events and technically linked domain names.

All data in this Report is, or was, freely available through standard Internet DNS and query protocols. DomainTools has not altered the data in any way from its original form, except in certain instances to format it for readability in this Report.

Data from DomainTools is presented as-is, and as captured from the original source. We make no representations or warranties of fitness of any kind.

About DomainTools

DomainTools offers the most comprehensive searchable database of domain name registration and hosting data. Combined with our other data sites such as DailyChanges.com, Screenshots.com and ReverseMX.com, users of DomainTools.com can review millions of historical domain name records from basic Whois, and DNS information, to homepage images and email settings. The Company's comprehensive snapshots of past and present domain name registration, ownership and usage data, in addition to powerful research and monitoring resources, help customers by unlocking everything there is to know about a domain name. DomainTools is a Top 250 site in the Alexa rankings.

Reach us at memberservices@domaintools.com if you have any questions on this report.

Hosting History

DomainTools tracks changes to a domain name's IP address, name server and registrar. These events can be useful signals that may indicate more macro events, including: domain name sales, transfers or deletions; taking a site live with new content; or a change in registration or hosting profile.

Screenshot History

DomainTools captures snapshots of website homepages on regular intervals. This content is useful for researchers to understand how a domain was used at various points in time. Due to the relatively high storage costs of screenshot data, the coverage of screenshot histories is in most cases not as thorough as Whois or hosting data, and this is especially true for dates early in a domain's history.

DomainTools has 30 records collected between Oct 28, 2004 and Aug 5, 2019.

Connected Domains

Shared IP Address

DomainTools uses proprietary techniques to discover other domain names that are hosted on the same IP address (web host) as StudMall.com. This is a sample of up to 100 randomly-selected domains from that dataset. Access to this data provides context in cases where knowing associated domain names has value.

The exhaustive list of connected domains by IP address is available in the Reverse IP product at DomainTools.com.

Shared Name Server

DomainTools uses proprietary techniques to discover other domain names that are hosted on the same name server as StudMall.com. This is a sample of up to 100 randomly-selected domains from that dataset. Access to this data provides context in cases where knowing associated domain names has value.

The exhaustive list of connected domains by name server is available in the Name Server Report product at DomainTools.com.
