Regarding the transfur community; Thunder Scientific Corporation

Created on Mar 2, 2024

Introduction

Thunder Scientific Corporation is a Roblox SCPF-style game, based off of the fetish transfur game named "[Changed](#)". Fallingtowers01, the owner as well as numerous other individuals across the entire group have committed questionable acts & are inherent predators. TSC at its core, as previously mentioned, is almost entirely based around the game called "Changed". The high ranking members of their group will not admit that it not only lacks creativity but it is also intended as a furry fetish game. If you've spent any time in or around this group, you can very obviously tell this game is weird. Our primary directive is to attempt to show you all the accusations, the truth, and the disgusting things we have found. Due to the sheer amount of evidence, there will obviously be holes within the document, however it is our job to keep this document to be as objective & accurate as possible. This document will also explain the full backstory behind TSC, and will provide a timeline of events. As aforementioned, this document will be curated to the best of our ability.

This document serves the purpose of educating the audience of TSC, and the rest of the SCP community. We can no longer allow such bad actors into our communities. Anyone who sympathizes with TSC or their situation should be considered as a morally compromised person, and swiftly removed from all communities for their disgusting world-view. Minors sexting minors over discord should NOT be something that we, as a collective, should deem acceptable. Teenagers of 16, 17, 18 openly grooming minors 13, 14, 15 is not okay, it's sick. Do not make excuses for these people and their blatant disregard for child safety and the well-being of our platform. This will be a full complete compendium on the Thunder Science Corporation, housing all evidence across the entire platform regarding it.

The Accusations

These are the current accusations that are being levied against the Thunder Scientific Corporation. Throughout the course of this whole section, we will go in-depth with laws, interpol frameworks, and other pieces of legal information regarding all of these crimes. These fetish groups are doing nothing but supporting and endorsing pedophilia to occur in adolescent groups, as well as other kinds of degeneracy, which you will see later on. Cybercrime has also taken place within this group, which honestly shouldn't be a surprise to you all considering they support the aforementioned practices of degeneracy and weird activities. general malice & corruption is also highly present within this corporation, there's countless reports of abuse & TSC even had a revolution around a month ago regarding Falling's abuse in the game. All HRs of all divisions were on strike because of Falling's abuse, however he lied to them and they all fed into it. The endangerment of children is mentioned through this transcript, however it's imperative that you keep in mind that this group IS a fetish group, TSC is based on the game "[Changed](#)", a RPG game of erotic nature made by the developers DragonSnow, of which is the origin of the transformation genre in roblox and the goo furies depicted in TSC.

Click on the links for a better understanding of the laws cited/or more information from trusted sources.

Predatory Behavior

There have been at least 16 instances of predatory behavior in Thunder Science Corporation that we know of. The actual crimes that he has committed is listed here: [Sexual Harassment](#). There have also been notable cases of [grooming](#) throughout this group. Moreover, plenty of people throughout this group also [possess CP](#), or otherwise known as Loli porn. The community in general is a highly unsafe place for minors, with multiple predators active in it, of which the owner and the second in command, FallingTowers01 and Anti_Protogen, respectively, are pedophiles themselves.

("They send you sexual messages – for example asking about whether you have been kissed or had sex, or compliment/please you. They blackmail you or tell you that you've upset them. They might say: "I thought you cared about me.").

Predators typically have a way of using manipulative methods; such as guilt tripping or overall victimization of themselves in order to deceive and exploit the minor in question. Also, we thought we should note that a discord report on TSC will likely be made at some point, though gathering all of the necessary message links and formatting it correctly for the Trust & Safety team will take some time.

Online Interactions/Grooming (see: Endangerment of Children)

The solicitation of Child Porn, or otherwise drawings & loli porn is quite frequent throughout the Thunder Science Corporation. Later in the document we will discuss how indescribable these actions are, and truly how deep this entire document goes. I expect this document to reach well over 100 pages, so please be ready for an eyesore of text & evidence.

Endangerment of Children

TSC has been from its inception an incredibly unsafe community to be apart as a minor, both due to its inherent erotic nature of being a transfur group, and from the rampant grooming and pedophilia, alongside numerous references to sexual content, both in the numerous discord servers and in game, of which will be shown in this document.

It's no secret that a group based off of the fetish game, "Changed" would be a danger to society. It's also no secret that these fetishes would influence the adolescence that we have on this platform, and this is no environment any adolescent or child should be in.

Game Discrepancies (see: Endangerment of Children)

As bad as it is, a lot of TSC members also exhibit degeneracy within the game. The game also includes degeneracy built into it. We will present several screenshots & pieces of evidence that supports this allegation, and will truly showcase what the average TSC member does.

Inappropriate Behavior (see: Endangerment of Children)

As you can see later in the document, many users of the Thunder Science Corporation exhibit degeneracy & inappropriate behavior between each other, and it's honestly disgusting. This should not be supported nor encouraged at all, especially because this is a platform filled with children & adolescents. This type of behavior could allow them to develop the mental illness known as "Pedophilia", or other mental illnesses.

Cybercrime

RCR & The Titanite Family is currently aware of at least 3 instances regarding cybercriminal activity, according to the Interpol Constitution & General Regulations, and any other relevant piece of information. After a careful review of the evidence presented, we have come to the general consensus that TSC has committed the following crimes: We believe that TSC has committed crimes in regard to the [Interpol Constitution](#). We have also read up on several news articles regarding the distribution of private information amongst the public, in which we have found several credible articles. According to Safelives, based in the United Kingdom; they describe several laws & other regulations that are set in place regarding the legal grounds for sharing private information. This document can be found here: [The legal grounds for sharing information](#). TSC has also gone against the current [Discord Terms of Service](#) & [Community Guidelines](#). More information regarding Interpol & its legal framework can be found here: [Interpol Legal Framework](#).

Corruption & General Malice

We are currently aware of many actions of corruption and malice from the Administrator himself to less known figures in the TSC community. [Here](#) is proof of someone being ranked a [developer](#) without any actual development access or teams, simply (presumably) free ranked for no reason. Here is another [screenshot](#) of abuse. This is just the tip of the iceberg, as there is [much more](#) evidence of this. We will present a copious amount of evidence later in the document regarding corruption & general malice. We have other areas of corruption that we plan on going over as well.

ISB Misconduct & Negligence

ISB has many cases of them wrongly handling cases, siding with degenerates, and releasing false information. ISB will, and has done horrible things to make sure their fetish group does not die. (Blackmailing, siding with groomers/degens, etc.) RCR does have experience with how bad ISB handles cases, and we will go mention a few of the cases of misconduct that have come into the knowledge of RCR and the Titanite Family. The ISB is essentially a friend group - & with nepotism comes negligence. As previously mentioned, the ISB intentionally neglects cases & disregard them due to the circumstances that may be present.

Predatory Behavior

There has been at least 16 instances of pedophilia or otherwise predatory behavior within the Thunder Science Corporation, that we know of, but before we present the evidence a few things should be made clear. The current membership status of the individuals that are listed below vary, as some still reside within the group (ex: anti protogen, falling01), while others have already been kicked out. Nevertheless, we should note that the ISB has neglected multiple reports & completely disregarded them.

 Falling's Behaviour  Falling - STORMCASTER

 The_truth_about_TSC_-_Google_Docs.pdf  TOS & COG VIOLATION REPORT

Before we can proceed with the evidence; Falling has attempted to excuse his behavior through a number of methods, that being; "I'm underaged". Note that a popular misconception is that, due to minors being unable to be (in layman's terms) legally classified as "pedophiles" or "sex offenders", they can not be sexual predators or actually engage in pedophilic behavior

For context: Strictly speaking, a pedophile is any "adult or older adolescent experiencing a primary or exclusive sexual attraction to prepubescent children" Older adolescents are defined by the [World Health Organization](#) as the age range between 15 and 19 years old

This does make it possible to class Fallingtowers01 as a pedophile, even if he tries to argue "a 15 year old can't be a pedophile" Note that the largest age group for Roblox players is around [9-12 years old](#) (23% of the playerbase), a close second is under [9 years old](#) (22% of the playerbase), and a majority (60% of the playerbase) of players on Roblox are under the age of 16 in general.

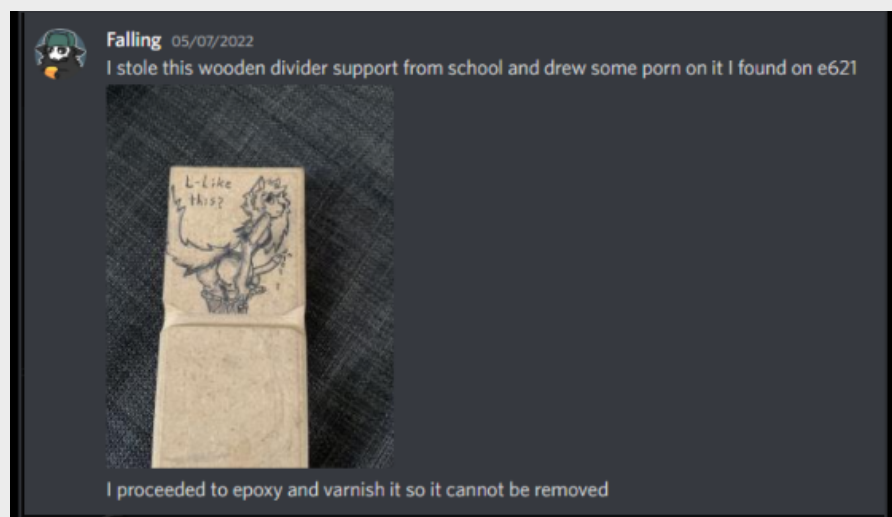

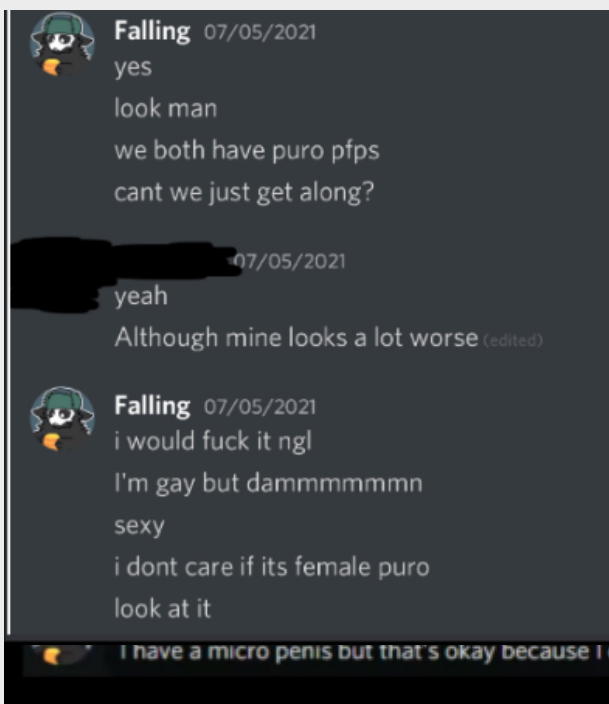

The Thunder Scientific Corporation game (with all of its **publicly viewable issues, recurring lfor many years**) is very easy to find due to Roblox's game recommendation algorithm and the massive overlap of his game with other games and communities that attract even younger audiences, such as "core/research facility" games/communities or SCP games/communities.

And statistically, he can also be classed as, at minimum, a sexual predator, very easily: "An estimated 80-90% of offenders are male, while 10-20% of offenders are female. [About 40% of offenders of children under 12 are children or adolescents themselves](#)" Sexual predation is not restricted to age, which means Fallingtowers01 can still also be classed as a sexual predator, and a groomer, due to his behavior, even if he was 15 at the time.

Fallingtowers01 publicly trying to excuse the behaviors of himself and other developers, through arguments such as:

By saying its "private, sexual matters" (despite the fact that this is obviously publicly displayed behavior in the first place, as it has been brought up by other people who have found this PUBLICLY AVAILABLE information). It should go without saying that making your sexual fetishes publicly findable and viewable on the Internet does not make it a "private sexual matter" anymore, so this argument is just quite simply ridiculous, and an attempt to make people not have to take responsibility of their own image or their own actions, just because they don't display them in the **immediate open view** (but an **open view** nonetheless). By saying "13 year olds are taught sex ed" (despite the fact that this is obviously meant to be done in an EDUCATIONAL context, not a CASUAL context like done here) and this is ignoring the fact that there are many, many controversial issues with how "sexual education" is taught in countries such as the United States or Canada. By. saying he himself is a "minor", basically making the assumption that this excuses his own behavior (despite the fact that minors, assuming he is one, can still be sexual predators and groomers)

With that hopefully made clear, we will now proceed with the evidence.

In this picture, Falling invites his community made up of mostly 13-15 year olds into a server designed for

Donni was an old community member from TSC, in the past it had come to light that donni was a pedophile. It is possible to verify these accusations by reading the following document on the case ([Donni's Funtime](#)) either way falling had complete knowledge of these accusations and the investigation being done by fynners. But he opposed taking action against the account. as shown in the following evidence.

For those of you unaware of what "LT" is, this won't effect you and you may carry on.

Ever since TSC split from LT, They have continuously attacked and defamed our group and after many attempts trying to negotiate with them to stop, and shape up their group, no action has been taken by their HRs nor by the members or their community. Members of theirs, High Ranking or not have used misinformation, out of context screenshots or otherwise unprovable content to attempt to make people leave our group. They can barely back up any claims they make and the majority of them seem to only exist as mindless drones to attack TSC.

I want proof that they harass you or have harassed you.

I'm not trying to avoid anything, but it's collective
Goes nearly a year back when I left
Majority of it is lost to time, in random dm's I'll never see again. In the original TSC chats which are deleted, in form of the unverified documents against me, in LT chats where if I dare step foot in I get screamed at
Even if it isn't your definition of harassment, it was still enough that it really started to effect me

Mercy <3 Today at 8:36 PM
so
it's all lost?

Falling Today at 8:37 PM
Well considering I can't even see the LT chats

The Great TSC Firewall

Ever since TSC split from LT, They have continuously attacked and defamed our group and after many attempts trying to negotiate with them to stop, and shape up their group, no action has been taken by their HRs nor by the members or their community. They have learned that they can fire at us as much as they want and we will never fire a single shot back. We have chosen peace but they are taking advantage of it, and it is seriously damaging our reputation. Our inaction against LT has taught them that they can do whatever they want with no consequences whatsoever, whether it be from their HRs or from individuals of their group. Regardless of how many times they say they will stop, no attempt has been or ever will be made, so it's time we act. They do not yet realize that their entire player base is entirely fueled by TSC, and we are the only reason they are still up. They ride our coattails and take our members, corrupt them, and turn them against us. Anyone in LT will be automatically kicked from the game, any personnel in both groups must choose a side or be kicked, being in LT will be treated the same as being in the Entourage, and no joint communications will be created. We will enact a strict policy for our GOIs that require they never associate with, or operate with LT, or they will be removed from TSC. Any other measures we see fit will be taken. It's time we actually stand up for ourselves instead of bending over and taking it in the ass from LT.

Glory to TSC. (edited)

Anti twice confirmed that his server had a porn channel. I can tell you the fact that minors had that role. They saw the pornography that he and others sent. Mind you; it was up for a while.

Falling's response to this was nothing more than a half-ass response that he most likely thought while he was gone.

 You say that the writer of the document said these messages, but then in one other instance the document writer speaks to the victim.

Screen:
 Ah, really? Like I want you to really read and look this in. I want you say to me with a straight face this is a genuine reaction from me. Sure, it's a little weird but not.
 As for why I'm saying it only was this in this, but it was in drinking ago that when **YSC** wasn't even a thing yet, or it was to new and underdeveloped nobody even followed the rules.
 And just to add on to this, I remember in question who has looked them came out is actually the writer of the document, who for months had a suggestive and sexualized Puro PFP. They had also deleted messages from our dm around this time, to avoid me saying any of it against them. While obviously I don't have any of those pictures, it's something you should consider. Changed Latex Reproductive Organs Debate

Falling for you <3 Comment a 2:00
 CIS go grab the rest of the stuff I sent in suggestions

Falling for you <3 Comment a 2:00
 Do CIS have cocks?

Falling for you <3
 Technically CIS would, according to changed infected people's bodies stay intact meaning CIS would have cocks. -----
 There's a diagram in puro's room somewhere I forget exactly but shows latex with a human body inside, digesting it's food
 Not only that, but the entire purpose of a latex, or specifically dark latex, is to attach over a body and use it as a "frame"

@CAPTAIN-3205 | The Tritagonist
 Though, doesn't the latex break down a person's cells and original physical mass? -----

Falling for you <3
 White latex probably, but dark latex no, it would break the entire point of them wanting a host in the first place

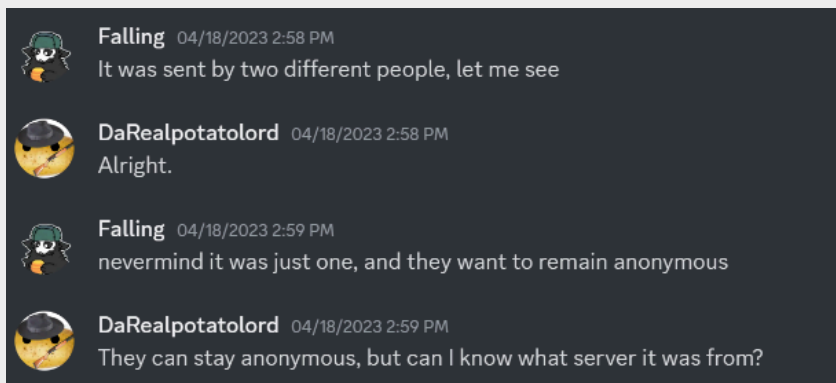

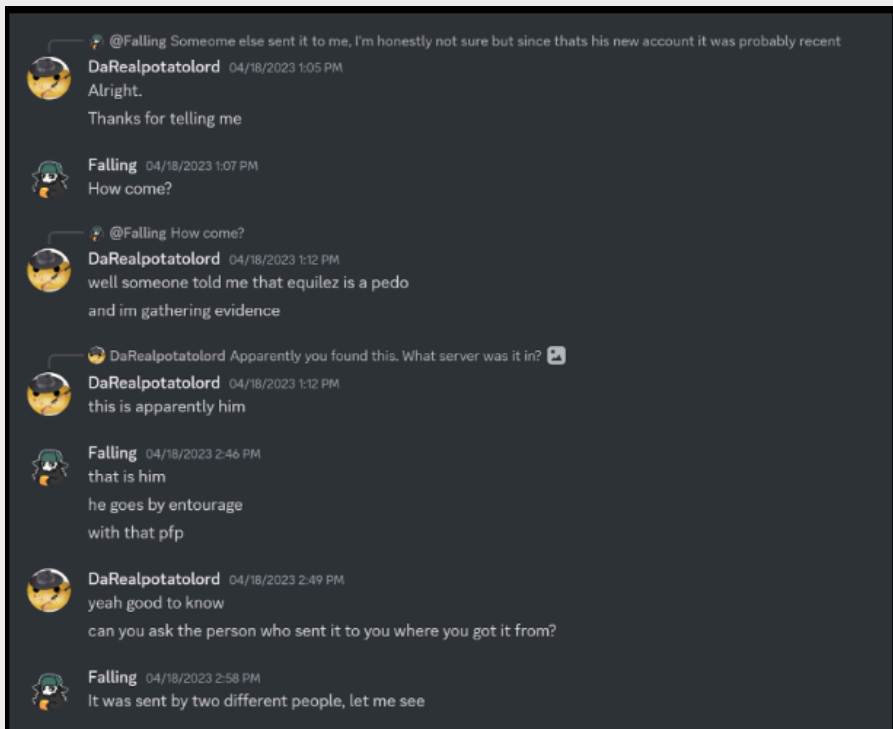

edwards glenses
 According to my research, I hypothesize that latex would actually have a cock and balls without a host anyways. Consider this: Puro has claws, although he states they are completely useless and just break off when he uses them. This shows that they haven't really evolved much past their Wolf/Human DNA mixture, so I conclude they would still have a cock, but it would be the same as their claws, useless. -----
 But he did instinctively use them in combat against Dr. K even though he knows they aren't good. Would this imply that he would use his reproductive organs out of instinct as well?

Adding to my theory:
 Yes, Puro does state latex don't have gender, but this logic is broken multiple times when he not only refers to himself as a guy, but some latex LITERALLY HAVE BOOBS and are even referred to as "Male" and "Female" dark latex in the gallery at the end of the game. Breasts are needed for helping reproduction. Now while latex

I don't get what is so concerning to you about someone's private, sexual matters. Like seriously, what's the big issue? I can guarantee you everyone reading this message has had a sexual thought before.

If you guys, and you know who you are, are seriously looking *this hard* for a reason to cancel someone, then why don't I help you out?

It's really crazy, I know... it's *even* worse than having an account on a porn site... it's... EVEN worse than having sexual thoughts... you ready?

[Jaker Fun Time](#) [Jaker's TSC Development Page](#)

Jaker, or otherwise known as Numeral was the head developer of the Thunder Science Corporation, up until he was exposed for having an intimate affectionate relationship with a minor, Suki, who at the time was 16-17 years old. Keep in mind, the head developer, Jaker, was 19-20 years old. This is completely unacceptable and inexcusable. At some point, Falling even allowed Jaker back into the group to "fix a data leak", or whatever

The Accusation

Before continuing with the evidence, the accusation details should be made clear.

For an unspecified amount of time. Jaker has been involved in an affectionate romantic

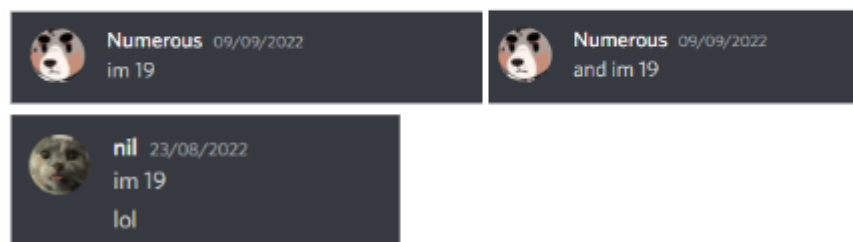

the excuse was, however I think we all can tell where the true intentions lied.

Fortunately, unlike past pedophiles, Jaker is particularly open to stating his age in public;
