The following program is what the ideology of Volker41ism stands for. As the creator of this ideology, I will now lay down some of it's main viewpoints, ideals and policies. The following points are to be considered essential points of Volker41ism that will not be changed as they are our main goals and we must do our best to achieve them.

## General concepts and a new beginning

1. We call for the union of a White European population in a common Nation, one with fertile land, where we can prosper and where we have authority over ourselves and also have the right to self-determination as a Volk, with the Volk being the name of a population united, at the very least, by a common Race and often times by a common culture, ethnicity, religion or even phenotype.

2. The Nation is formed by the voik and the land where the Volk lives. We believe that in order to preserve our Nation, we need a strong and well trained military capable of defending our People and our land. All able bodied men aged 18 must enlist and serve in the armed forces for at least 1 year.

3. The Nation's Volk is it's greatest treasure. We call for a devotion of our leaders to the common good of the Volk. There can be no room for corruption or greed. We shall enforce that in severe ways.

4. The main principle of Volker41ism is the following:

THE COMMON INTEREST BEFORE SELF-INTEREST.

All of our other principles, beliefs and actions shall come from this basic principle. The common good of the White Aryan Volk shall guide our leaders to do what is right. Before acting, the leaders must ask themselves the following question:

“Is it good for the Volk?”

"You stole that line from me Volker!"

And from there on, our leaders must only promote what is positive for the common good of the White Aryan Volk. ✓

5. A truly healthy Volk is one that is connected to Nature. We believe in the defense of the Natural environment, so there shall be severe punishments against those that harm Nature or torture animals.

6. In order to connect our People to a healthy Natural environment, we shall create a great system of Natural parks and Natural reserves.

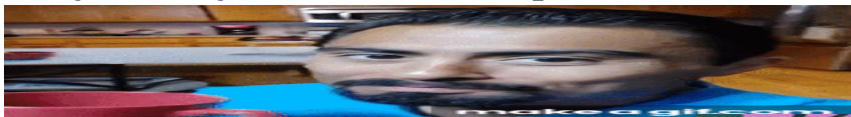

Yes, there will be urban centers and a strong industry, but yet the wonders of Nature given to us so kindly by the Creator must be cared for and preserved for us and for the future generations.

We cannot let rampant greed destroy the Natural world.

## Economy, birthrates, healthcare and education

7. We must put an end to the slavery of the Volk by interest rates. We believe in the abolition of usury and other forms of economic slavery by greedy money lenders that exploit the Volk.

8. We support the Nationalization of our

9. While we are against capitalism and greed, we are also against communism and marxism. We are not against private property or money itself, we are only against the accumulation of big amounts of wealth by a few, as this harms the common good of the White Volk and is unfair.

We are not against White families owning homes and other forms of small property and we are not against small businesses and a strong but well regulated private sector of the industry, so long as they are all honest, not run by foreigners and also serve the common interest of the Volk.

10. We demand the sharing of profits from the big private sectors of the industry so that we may fund public programs such as public healthcare services, public education and defense.

11. We defend the right of workers to form worker unions and even syndicates, as long as these worker unions and syndicates are only used to promote reasonable demands and work for the common interest of the Volk and are not used dishonestly as leftist tools of political and economic terrorism.

12. We demand financial support to White Aryan families, with generous economic incentives being given to White couples. They shall receive a generous amount of financial support from the State for every White child they have. We believe that such economic incentives are necessary in order to increase White Aryan birthrates.

13. We support the creation of a public healthcare system for all the White Aryans citizens living in the Volkerborean Reich. This doesn't mean that we would ban private healthcare, as the more fortunate that are able to pay for it should be able to choose private healthcare.

14. We shall create a public education system for all of the White youth in our Nation. The public education system shall equip the young, teach them useful and important subjects and also train them so that they may work well in the future and help society prosper.

15. A people who are not convinced of their unique Nature and value will perish. A people who know nothing about their history and origins will corrupt the present and ruin the future. STOLEN FROM MEIN KAMPF

For this reason, we demand that all schools teach true and honest history to our children, with a higher focus being placed on the National history of our Volk than on any other subjects, so that our children may be truly connected to their past, ancestors and heritage.

## Our Traditions and our struggle against degeneracy

16. We recognize Natural laws as being the main driving force of the Natural world. Whatever their origins may be, we believe that we should do our best to follow them.

17. We recognize the Traditions of our Volk as being very important. We stand for traditional marriage, with a man as a husband and a woman as a wife, with them having many children and raising them together as a family. Natural laws and whatever divine force created them made the man and the woman for each other and gave each of them their traditional roles.

18. We are fiercely against race mixing since it destroys the racial unity of the Volk.

19. We are fiercely against homosexuality, transgenderism, pedophilia, pornography and all degenerate types of subversion that are being pushed by modern society and those that run it.

What about Zoophilia?

20. Drugs are degenerate, addictive, unhealthy and also tend to promote apathy and a false sense of gratification. We are against drug addiction and we believe most drugs should be banned for the common good of the Volk albeit there could be some exceptions.

21. We support freedom of religion for all the different faiths and denominations in our Nation as long as they are Pro-White and are also very anti-jewish.

As a result of this, when it comes to Christianity, we support the ideals of Positive Christianity, as we shall all stand again fiercely against the jewish materialist spirit of atheism and degeneracy with our Positive Christian doctrine.

22. In addition to our previous point, we also believe in a possible revival of old European Paganism, not in order to destroy Christianity or replace it, but just as another religion.

Our hope is that both Positive Christians and Pagans may live peacefully and respect each other in our Reich.

23. Lastly, we see the State as a necessary tool to achieve our goals, not as a good or a bad thing on it's own but we still demand the creation of a strong National State with the primary goal of caring for the common good of the White Aryan Volk living in our Reich.

24. We shall stand for the points laid in this text. This is our ideology, this is what Volker41ism stands for.

And so, this is the ideology of Volker41.

I shall make the great man of Braunau proud of my work.
